

TECHNOLOGICAL BREAKTHROUGH!

Introducing the new Bio-Optic Organized Knowledge device, called BOOK

BOOK is a revolutionary breakthrough in technology; no wires, no electric circuits, no batteries, nothing to be connected, or switched on. It's easy to use. Even a child can operate it.

Compact and portable, it can be used anywhere – even sitting in an armchair by the fire – yet it is powerful enough to hold as much as a CD-ROM.

BOOK is constructed of sequentially numbered sheets of paper (recyclable), each capable of holding thousands of bits of information. The pages are locked together with one of two different custom devices, a BINDER or DOUBLE STITCH BINDING, which keep the sheets in their correct sequence. Opaque Paper Technology (OPT) allows manufacturers to use both sides of the sheet, doubling the information density.

Each sheet is scanned optically, registering information directly to your brain. A flick of the finger takes you to the next sheet.

BOOK never crashes nor requires rebooting. The “browse” function allows instant movement to any sheet, forward or backward, as one wishes. Many come with an “index” feature, which pinpoints the exact location of any selected information for instant retrieval.

Awareness Days in July and August

July 1st –30th	National Picnic Month
July 3rd.	National Bereaved Parents Day.
July 8th—14th	Carers Week.
July 24th	The Samaritans “The Big Listen”
August 1st –30th	Psoriasis Awareness Month.
August 9th –15th	Afternoon Tea Week.
August 10th—15th	National Allotments Week.
August 13th	International Left Handers Day.
August 24th	National Plum Day.

(More details may be easily found on the internet)

IN THE TIME OF PANDEMIC

And people stayed home
and read books and listened
and rested and exercised
and made art and played
and learned new ways of being
and stopped
and listened deeper

someone meditated
someone prayed
someone danced
someone met their shadow

and people began to think differently
and people healed
and in the absence of people who lived in ignorant ways,
dangerous, meaningless and heartless,
even the earth began to heal

and when the danger ended
and people found each other
grieved for the dead people
and they made new choices
and dreamed of new visions
and created new ways of life
and healed the earth completely
just as they were healed themselves.

Many have found Kitty O'Meara's poem comforting and inspirational. Many also have found experiences caused by Covid 19 to have been life changing and devastating.

Could any readers provide for the rest of 2021 issues any positive and heartening results of the effects of the virus over the past year and a half?

ED

12 MEN/WOMEN WENT TO MOW, WENT TO MOW A MEADOW.

The evening of Thursday 17th June stayed dry, calm and cooled down making the working conditions more bearable for the 10 strong team who so generously mowed the church banks, cut the hedges, cut back undergrowth, cleaned the church drive and emptied the grass bins.

None of this is easy, the banks are dangerously steep but we have some remarkably capable volunteers who provide all their own equipment and work efficiently.

Thank you so much to Brian and Tristan Whittaker, Peter, Andy and Michael Hollins, James and Dawn Oulton, John Minger, Jane, Darren and Katie Platt, and Andy Peacock. They even tell me they enjoy doing the job.

Many many thanks. Also we must add our thanks to all the regular churchyard mowers who do a sterling job throughout the growing season. The vicinity of our Parish Church is a delight.
Chris Bailey
